

ORIGINATOR X

ORIGINATORX

ASSET TOKEN **ISSUANCE** **PLATFORM**

CREATE, MANAGE, AND TRANSFER

Asset tokens on the Ethereum blockchain

The digital transformation of assets and equity has become the new economy. OriginatorX underwrites the entire process and delivers a powerful management and audit application to Issue ERC20 Tokens and streamline them into the new global economy by SmartContract Auctions.

This offers clients access to our full security audited protocols that facilitate the Underwriting and Creation of standardized ERC20 tokens backed by Company Equity or Assets, and the set up of their Auction pricing contracts.

White-labeled platform with Apps available for Merchant and Customer

ORIGINATORX WORKING

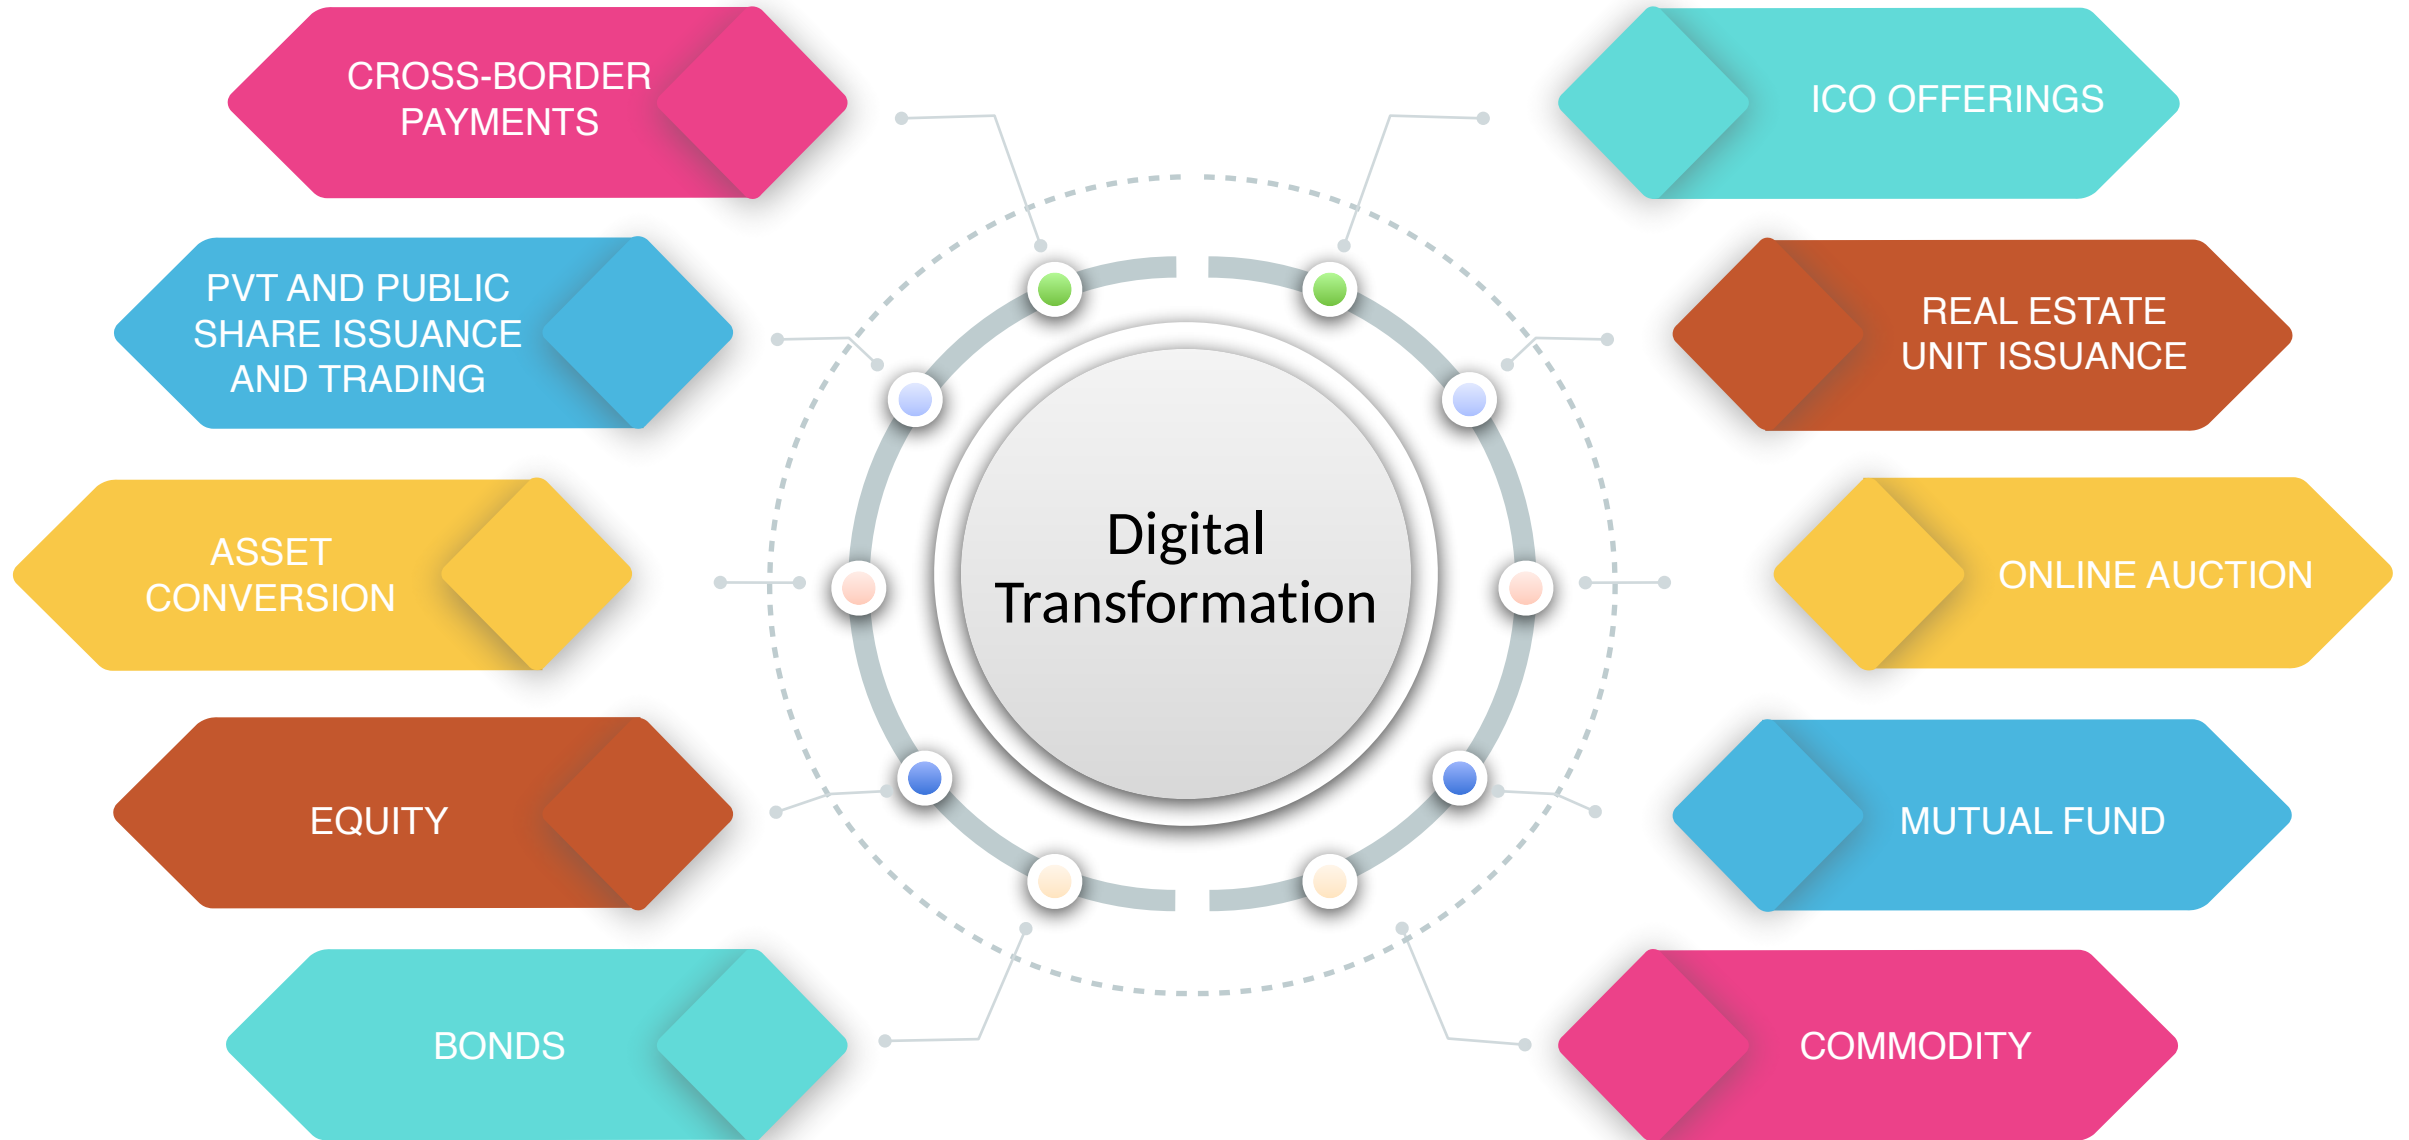

Any business can be tokenised to crypto equity with the use of OriginatorX

OriginatorX underwrites the business, breaks it up into tokens, Publish the token through smart Contract auction, Does eKYC, Audits and Manages and Controls the tokens

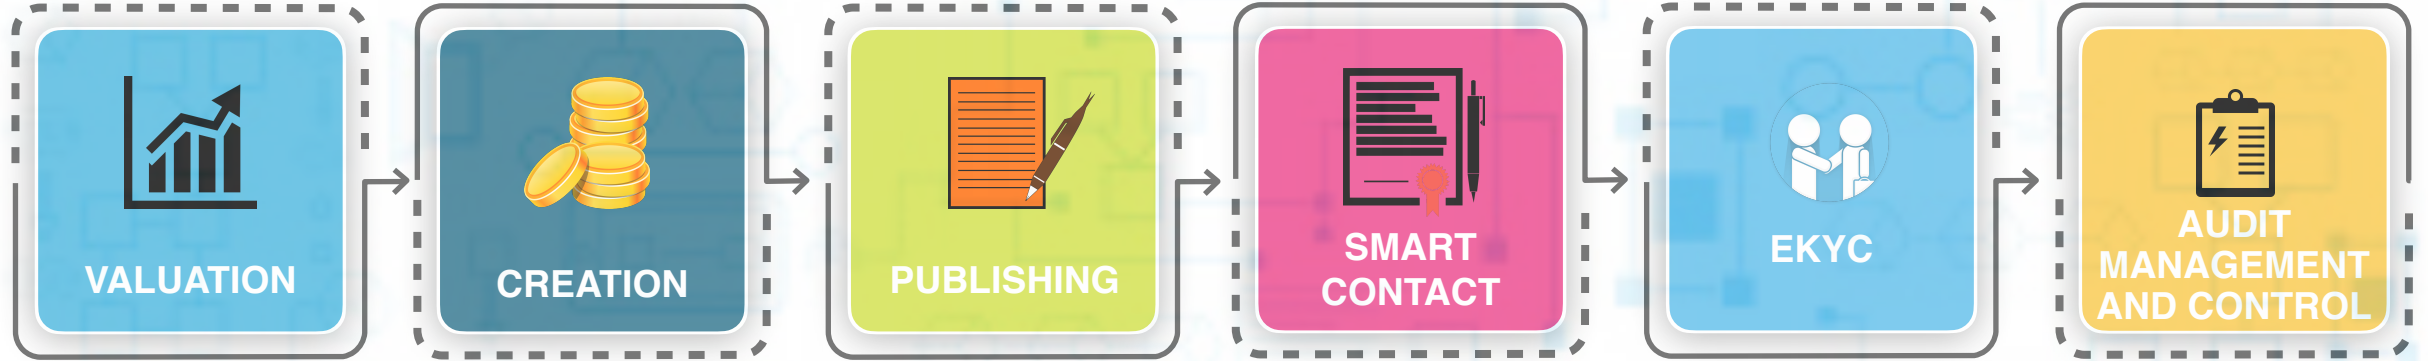

ERC20 Tokens represent ownership rights of a company on the blockchain. They are backed by equity which represent ownership, claim to asset, claim to revenue and participation, compensating investors for the risk in case of a default

ORIGINATORX APPLICATION

As global markets transition to digital everything, the need for underwriting and issuing will surge

UNDERWRITING PROCESS

Identify the Asset or Equity and Initial Valuation

Originator creates any asset which has tangible value in to ERC20 Tokens

Originator publishes the tokens created

Terms of sales are set in the contract

eKYC is done of both holder and buys

OriginatorX tracks and keeps the records in the ledger

HOW DOES IT WORK?

Buyer and sellers are onboarded on the platform and eKYC is being done

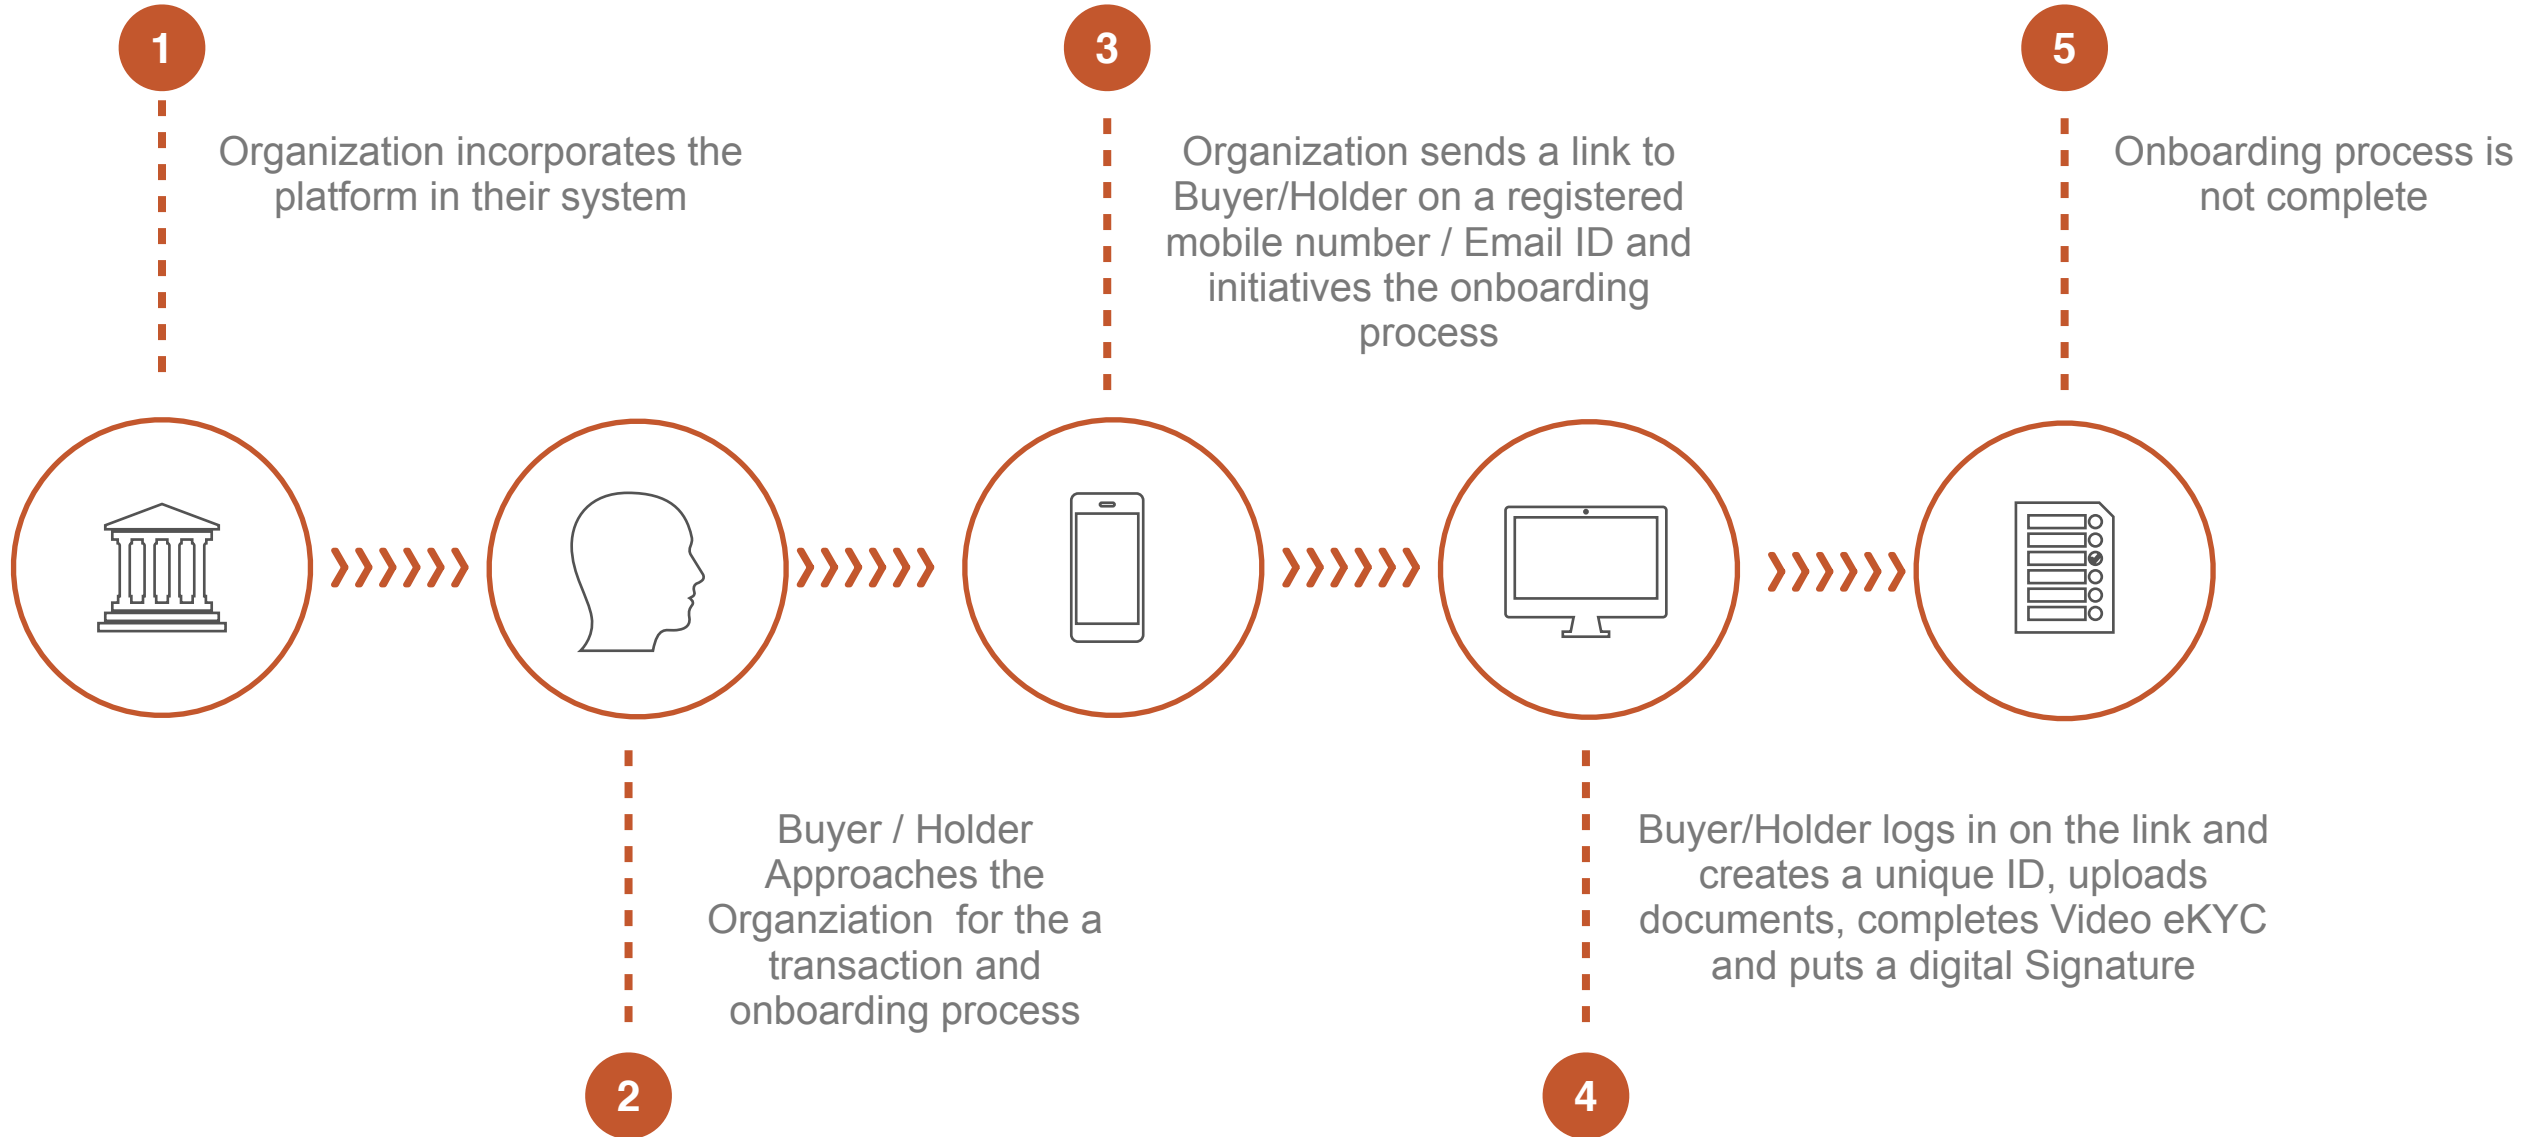

Seller has Assets with tangible value

OriginatorX breaks the Asset into units / Tokens and publishes the tokens

Buyers can buy these tokens using smart contract. SmartContract can also be auctioned by the seller

Transaction is complete and all the data is stored in the ledger

DIY ONBOARDING AND EKYC

BASIC REQUIREMENTS FOR ORIGINATORX

ORIGINATORX

To use OriginatorX 1.0, users need to have the following ready

Ledger or Metamask to access our automated services

A valid legal opinion that states :

- The company's authority to issue tokens
- The issuance is a utility or a security
- If it is a security offering, the company should state that it will follow security laws in order to activate the tokens/auction contracts.
